

Grow Anywhere, Grow Everywhere

Vertical Gardening

We love our

Mark made the installation so easy, and we couldn't believe how the first two seasons have gone. What was a boring elevator tower is now alive and attracting a lot of positive attention. Thanks Mark and Vertical Garden Supply!

—An Appreciated Customer

Nothing Beats Mother Nature

Our Complete Product Line

The Varden™ Kitchen Garden

Shipped pre-assembled and ready for easy mounting, the 2' x 3' unit is perfect for gardeners of all skill levels and living spaces. Its trays hold up to 36 plants and include efficient drip irrigation lines for proper watering.

Living Wall Systems

Whether you want a calming collection of succulents or a vibrant spray of flowers, we offer the components you need to create a living wall that saves you from backbreaking labor and your plants from overcrowding.

Vertical Farming Systems

Fewer pesticides, less dependence on unsustainable food supply chains. Our A-frames and leaning gardens mimic natural environments and give roots space to breathe, so you can grow fresh, organic veggies from anywhere.

Retaining Wall Blocks

Covering 1 square foot each, our easy-to-install wall blocks are made of lightweight recycled plastic and can be filled with soil to grow your own landscaping masterpiece.

The Future Is Tight

Greener Spaces in Unlikely Places

Small unused spaces, whether in a suburban kitchen or a studio apartment, are an excellent opportunity for independent farming. Vertical Garden Supply's vertical gardening systems take advantage of every inch with user-friendly racks that hold dozens of plants, from tomatoes and basil to succulents and daisies. Our solution for nontraditional gardening reduces waste and gives users the pride and confidence of knowing exactly where their food is coming from.

What's So Great About Vertical Gardening?

Less Water&DirtWasted

Zero Root Rot

**Minimalist Design
for Compact Spaces**

Full Customizability

**Suitable for a Wide
Variety of Plants**

Sustainability for All

As the world's population continues to urbanize, backyard gardens are becoming less of an option for many people. Our systems are designed with easier access to fresh produce in mind. Vertical green spaces aren't just good for self-reliant food sources, either; they're good for the overall wellbeing of people and the planet, and we want as many consumers to experience their benefits as possible.

Our Edible Plant Program

You can preorder a wide variety of delicious herbs for your vertical garden, including parsley, spinach, basil, mint, and much more. Package options include a box of 4 one-foot long vardensoks with 3 plants in each or a box of 36 single fast-start plants.

What We Believe

Everyone deserves access to safe, fresh, and sustainably grown food.

Urban spaces can promote environmental integrity with the right technology.

We can improve the way the world eats by evolving the traditional garden.

It's time to take your garden to new heights.

Grow organically and independently with a vertical system from Varden Vertical Gardens
